AddDeleteFilter
Label

1- 1 of 1

URL contains: [Apply Filter](#) [Clear Filter](#)

Applying a filter will change the view to display only those URLs that contain the specified pattern. (A pattern is simply a list of characters. Patterns do not support regular expressions). Note that this does not alter your search engine.

Site Label Available in Site Restricted JSON API

Submit indexing and removal requests via [Google Search Console](#). [Learn more](#)

Search the entire web

ON OFF

Augment your results with general Web Search results.

General Web Search results are not available in the Site Restricted JSON API.

Programmatic Access

Custom Search JSON API

Limit of 10,000 queries per day.

Get started

Custom Search Site Restricted JSON API

No daily query limit.

Get started

Restrict Pages using Knowledge Graph Entities

Restrict pages from the above site list to only those that are about the Entities listed below.

You can add up to five (5) Entities to your Search Engine.

Restrict Pages using Schema.org Types

Restrict pages from the above site list to only those that contain Schema.org types from the list below.

You can add up to ten (10) schema.org types to your Search Engine. Note that when you add a node, all its children automatically get included, so you do not need to add them again. For example, if you add CreativeWork, you do not need to add Book, ImageObject, VideoObject etc. separately.
